No Soot!

**No Disagreeable
Smell!**

**Cannot be
Exploded,
as the Oil never
becomes Warm.**

The demand of the times for a **SAFE, CHEAP, EFFECTIVE** and
economical **COOKING STOVE**, is fully, and to entire
satisfaction met in

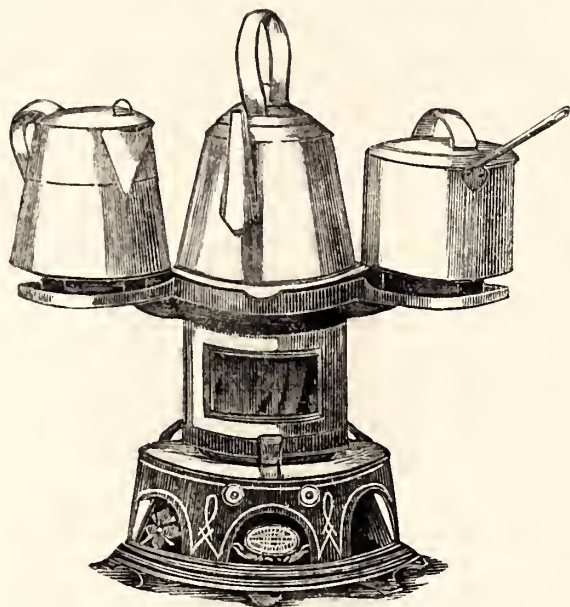

THE "MAYFLOWER,"

*which completely does away in Summer, with the
excessive Heat, Dust, Ashes, Smoke, and
the continual blacking of the old
style stoves.*

A saving of one-half is effected over the old methods of Cooking,
besides being done in a superior manner, with less waste,
by a moist and uniform heat.

The Baking and Broiling of Meats, continue to draw constantly to their use, those who appreciate the luxury of nicely cooked food. No overheating or burning of dishes need ever occur, as the heat is perfectly under the control of the operator, and the results certain and uniform.

"MAYFLOWER" COOK STOVE, No. 2.

THE "MAYFLOWER"

IS THE ONLY SELF PROTECTIVE OIL STOVE,
AND IS THE LEADING INVENTION IN ITS LINE!

*The "Mayflower" is made of Galvanized Iron,
thereby making it very durable.*

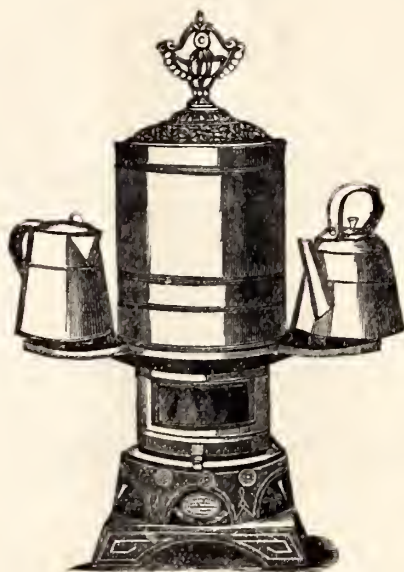

*The "Mayflower" is the only Oil Stove that has a
perfect Parlor Heater.*

It Bakes, Boils and Roasts splendidly!

*It gives entire protection from any formation of
Gas!*

*It insures an economical use of the Oil, FOR IT
DOES NOT, and CANNOT, HEAT THE OIL!*

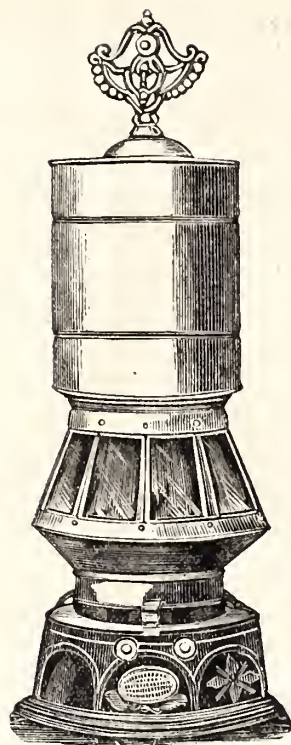

GRAND COMBINATION COOK STOVE AND HEATER.

THE OIL COOK STOVE

when not in use for cooking purposes can be readily transformed into a Parlor or Sitting Room Heater, by removing the cooking utensils and placing one of our Heating Drums on the Stove, thus making it not only efficient for the Kitchen, but a good Heater and ornamental for the Parlor, or it can be used at the same time, with the drum as a Heater, and the Extension Top to keep the food hot.

The "MAYFLOWER" is a Cold Air and Hot Blast Stove, and does not use water protection which has been declared a nuisance. The air enters through the Arches of the Cold Air Jacket and passes all around the interior of the Stove, striking against the side of the reservoir, the space from the arch to the apron, one and a quarter inches deep, being filled with cold air, which is constantly changed by the draft of the burning flame, so that the oil does not get warm. No Oil Stoves are safe that heat their Oils.

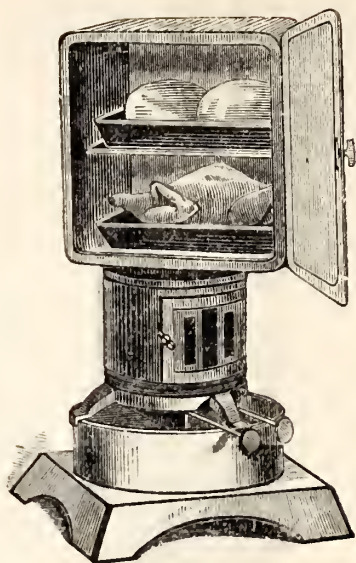

THE MAYFLOWER

Stoves, as Heaters, in their season have proved a great success, giving a sufficient and agreeable soft heat, and a most cheerful light, with NO OFFENSIVE SMELL; the smaller sizes being especially desirable for Asthmatics or for sick rooms generally, while we are enabled by our varied and extensive sizes to offer ample facilities for heating large Parlors or other Rooms, Offices, Stores, &c., saving the trouble and annoyance of Ashes, Dirt, Smoke, &c., at much less expense of heating than with Coal, Wood or Gas.

No.	2,	Heats Room	10 x 12,	2 Qts. Oil in 24 Hours.
"	3,	"	12 x 16,	3 " " " 24 "
"	4,	"	14 x 24,	4 " " " 24 "
"	6,	"	24 x 42,	10 " " " 24 "

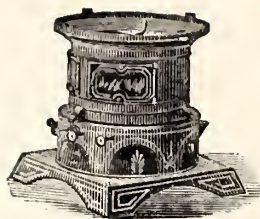

Oil bought by the barrel, as housekeepers usually buy their coal in quantities for the Winter, makes the cheapest fuel for families that has yet been discovered.

THE “MAYFLOWER”

“will do the work required of a Cook Stove better than the Coal, Wood, Gas or other Oil Stoves in use,

in consequence of the NEW PRINCIPLE introduced in its construction, which creates a steady Hot Blast, and is never subject to the Poor Draft of chimneys. The ease with which the heat can be graduated to any degree required, is an important feature of the “MAYFLOWER.” The most delicate shades of heat for Cake, Custard, or other dessert articles, can be produced instantly, or varied as wished during any special cooking operation. Meats Roasted by the intense and uniform heat of this Stove are superior in quality, as the juices are better retained, the flavor finer, and the shrinkage less. Boiling, Baking or Frying are done with greater perfection than by any range, in consequence of this facility for producing any temperature desired.

THE "MAYFLOWER"

Is the only Oil Stove that gives equal satisfaction for Summer and Winter use. Our Stoves are of various sizes, and ample for any work required for cooking, in Families, Boarding Houses, Hotels, &c., and will be found the most complete for Heating, Baking and Roasting of any yet invented.

WE ARE AGENTS FOR THE SALE OF

THE PERPETUAL WICK

FOR LAMPS OF ALL KINDS.

Makes no Smoke! Needs no Trimming! Gives no Disagreeable Smell!

DIRECTIONS.

Trim Stove Wick once a day; Trim Wick level with the Tube and light as trimmed, and the heat of the Stove will give proper flame. Should it not be sufficient, turn the ratchet to the desired height, but not so as to smoke in the least.

CAUTION.

The only suitable Wick for the "Mayflower" Stove, is the "Mayflower" Wick, made expressly for this Stove, and has the name "Mayflower" stamped on the Wick. Always to be had of the manufacturers or agents. One set of wicks with proper care will last four months.

Liberal Discount to the Trade.
